

Civil Engineering Site Manager – Metcalfe Plant Hire Limited

Metcalfe Plant Hire Limited was established in 1971 in Cumbria and has grown to become one of the North of England's largest construction plant hire businesses. Based in Penrith Cumbria, the company offers all construction industry plant, equipment and machinery hire, and compliments this with a construction & civil engineering business in its main-stream business operations.

The Company prides itself on its flexibility and dedication to ensure satisfaction to all Customers and Clients. This ethos has been the cornerstone of our strategy and culture and has resulted in generating repeat business from our core key Clients and Customers over many years.

Due to continued success another Civil Engineering Site Manager is required to join our team based in Penrith, Cumbria. This position would suit a current Site Manager or an experienced Site Supervisor looking for the next step in their career.

You must have experience working within the civil engineering and infrastructure sector working on projects with values up to £1M. Key experience will be required in Groundworks, Highways Infrastructure and ideally Residential Roads and Sewers

Key responsibilities:

Be familiar with, and demonstrate commitment to the requirements of the Health & Safety and Environmental Policies

Managing 3 - 5 projects at any one time

Regular meetings with the client and Contracts Director

Reviewing and assisting with pre-tender documents

Outline methodology and sequencing for projects and contract programmes

Managing Site supervisors and third-party consultants/contractors as required

Develop and maintain relationships with relevant client representatives, supply chain and local authorities.

Provision of reports and management information to senior management and client

Overall responsibility for project budget, costs, cash flow and margin,

Manage Contractual issues arising with client and sub-contractor.

Suitable Candidate:

You should be able to demonstrate technical knowledge in Construction, Groundworks and Civil Engineering projects to a value of £1M.

Evidence of Technical knowledge and experience in Highway and Infrastructure related construction methods,

Experience of Groundworks

The ability to deliver projects on time and to budget.

Self-motivated, strong management skills

Track record of project delivery

In-depth knowledge of Health & Safety and other regulatory matters

Excellent communication skills

Salary: Competitive with Company Commercial Vehicle

Location: CA11 Penrith, Cumbria
